

+ ONE PC

*the least
expensive
way to
add a
2nd PC !*

*thinking about buying a 2nd PC
for the home or office ?*

... think again.

+ONE PC

A Second PC? Or a PC for Two?

There are many good reasons to buy a second PC. But there is one GREAT reason not to: +One PC. This revolutionary product provides all the hardware you need to give another person the full benefits of a second PC. You simply add a monitor, keyboard and mouse.

All the Benefits of a 2nd PC

With +One PC, two people can each run their favourite applications. For example, while you prepare a multimedia presentation for work, your partner can surf the World Wide Web planning your next vacation. Or your child can research an online encyclopedia for her science project.

distributes it among all users, so that each user gets the power they need, when they need it.

Work in your own Personal Environment

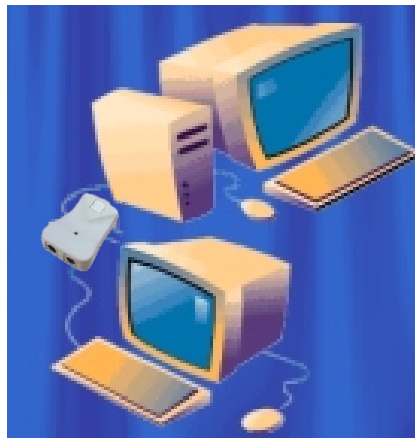

+One PC makes it easy for you to tailor Windows Desktop to your own tastes. So everyone gets his or her favourite screen colours, wallpaper and icons. This is especially handy if you want to prevent access to certain applications or present a simple interface customised to each person's needs.

A Price You too Can Afford

You would expect to pay a lot for a product as useful and powerful as +One PC. After all, it offers the same functionality as a

Setup is as easy as 1-2-3

- **Step 1**
Insert PCI adaptor Card into PCI slot in the PC
- **Step 2**
Run the 15 feet extension cable from the PCI card & connect second user monitor on VGA extension cable. Connect the USB extension cable to the USB Port of the Host PC through the USB Extension cable.
- **Step 3**
Connect the PS/2 Keyboard & Mouse to the connector box & install the +One PC software.

+One PC comes with a card that plugs into your PC & connects to the 2nd Monitor, a connector box for the 2nd keyboard and mouse, and +One PC software that takes advantage of the built-in multitasking of Windows 2000/XP. +One PC also includes a 15-foot extension cable set so that each of you can work in your favourite place.

Surf the Internet Together

+One PC allows all users to surf the World Wide Web at the same time. You need only one modem, one phone line and one Internet connection. You save by not having to install a second phone line or having to pay for the second Internet connection. And with 56K modems, surfing is faster than ever.

How does the +One PC Work?

Today's PCs are extremely fast. Even when you type as fast as you can, the vast majority of your computer's processing power goes unused. The genius of +One PC is that it takes that extra power and

second PC would. But because much of the power of +One PC comes from the PC you already have, the product reaches you at an affordable price. Hint: You only need to buy an extra monitor, keyboard and mouse, your total cost is less than half the price of a second New PC.

That is why we can say : The Least Expensive Way to Add a 2nd PC User.

Application Areas

The +ONE PC is ideal for any situation where there is a need to increase the no. of PCs -

Schools • Universities • Libraries • Cyber Cafes • SOHO • Hospitals & Clinics • Training Institutes • Point of Sale Terminals • Government Sector • Corporate Sector • Call Centres • Stock Brokers • Advocates • Doctors • Data Entry
